

## It's the Law

### Decision Making Steps

1. *Identify the problem*
2. *List the information you need to solve the problem*
3. *Evaluate the information (weighing the pros and cons) then make a decision that's best for you.*
4. *Plan to implement your decision. (How do you stick to your decision?)*

Situation: A couple of your friends were caught smoking at school and you know that they bought cigarettes from a neighborhood convenience store. Your mom says she trusts you and knows that you don't smoke but asks if you know where they got the cigarettes. What do you tell her?

Identify the problem:

---

---

List the information you need to solve the problem:

---

---

---

Evaluate the information (weighing the pros and cons) then make a decision that's best for you:

---

---

---

Plan to implement your decision. (How do you stick to your decision?)
